

Immediate comfort and protection from a reusable foam ear plug

QUIET (NRR 26) ear plugs are an ideal choice for protection, comfort and extended wear. They're designed to be a great value for weeks, or even months of protection. They are washable and require no rolling prior to insertion.

Our patented design offers a smooth non-irritating outer skin that is comfortable enough for all-day use, and is perfect for work environments. Since *QUIET* ear plugs can be used for months, your cost of hearing protection will be cut dramatically.

Reusable

Cost-effective hearing protection for everyday or occasional users.

No rolling required

The unique design of *QUIET* ear plugs provide ease of insertion and immediate comfort.

Washes with soap and water

Easy care extends the life and adds value.

NRR 26

One of the highest rated reusable ear plugs available.

Reusable ear plug fitting instructions

1. Reach around your head and pull up and back on your outer ear. This straightens out the ear canal, making way for a snug fit.

2. Hold the stem end of the ear plug and insert it well inside your ear canal until you feel it sealing and the fit is comfortable.

▶ **Test the fit.** In a noisy environment, and with ear plugs inserted, cup both hands over your ears and release. You should not notice a significant difference in the noise level. If the noise seems to lessen when your hands are cupped over your ears, your ear plugs are probably not fitted properly. Remove and refit following instructions.

▶ Always remove ear plugs slowly, twisting them to break the seal. If you remove them too quickly, you could damage your ear drum.

▶ Reusable ear plugs should be inspected and cleaned often in soapy water. If they become hard, torn or deformed, they should be replaced.

Packaging options

Impact cases are the perfect partner to extend the use of *QUIET* reusable ear plugs. By storing ear plugs in impact cases, they are less likely to get lost. The Leight Ear Plug Dispenser is a permanent protection center that is easy to use, and buying *QUIET* ear plugs in bulk means you're not paying for unnecessary packaging.

Corded or uncorded

For users who frequently remove hearing protection, the corded version of *QUIET* offers greater convenience, and they won't get lost. They're also more visible to help compliance supervisors ensure that employees are wearing hearing protection.

Attenuation Data

QUIET
